

## ABOUT THE AUTHORS

### Alfréd Dulai

Dr. Alfréd Dulai geologist was born in Eger, Hungary in 1967. He received his PhD in paleontology at the Eötvös Loránd University, Budapest for studies of Early Jurassic brachiopods of Hungary. He is chief curator and research scientist of the Department of Palaeontology and Geology of the Hungarian Natural History Museum; he

is Head of the Department from 2010. He is curator of the Neogene Invertebrate Collection and in this position he has several publications on the invertebrate faunas of the Central Paratethys (decapods, bryozoans, chitons, bivalves). However, his main research interest is the Cenozoic brachiopod fauna of Europe and occasionally still works on Mesozoic brachiopods of the Tethys. He is editor of *Fragmenta Palaeontologica Hungarica* and associate editor of *Cainozoic Research*. He was Chair of Paleontology Division of Hungarian Geological Society between 2009 and 2015.

### Matúš Hyžný

Dr. Matúš Hyžný, palaeontologist was born in Kežmarok, Slovakia in 1985. At the age of 14 he found his first fossil crab. In 2012, he received his PhD at Comenius University in Bratislava, Slovakia for studies on malacostracan associations of the Central Paratethys. After the 2-year postdoc research stay (2013–2015) at the Natural History Museum in Vienna, Austria, he

returned to his alma mater where he currently works as a researcher at the Faculty of Natural Sciences, Department of Geology and Palaeontology. His research focuses on the geology and palaeontology of the Central Paratethys and the systematics and biogeography of Mesozoic and Cenozoic decapod crustaceans with a special interest in ghost shrimps. He is an executive editor of *Palaeontologia Electronica* and a member of the editorial board of *Geologica Carpathica*. He authored or co-authored over a hundred of scientific studies, mostly on the fossil record of decapods.
