

# CONTENTS

<b>PREFACE</b>	<b>7</b>
<b>PART 1</b>	
TEORETICAL THOUGHTS	9
<b>Antal Füst</b> Calibration of monitoring systems	11
<b>János Geiger</b> Some thoughts on the pre- and post-processing in sequential gaussian simulation and their effects on reservoir characterization	17
<b>PART 2</b>	
GEOSTATISTICAL CASE STUDIES IN RESERVOIR CHARACTERIZATION	35
<b>Tomislav Malvić, Kristina Novak Zelenika, Marko Cvetković</b> Indicator vs. gaussian geostatistical methods in sandstone reservoirs – case study from the Sava Depression, Croatia	37
<b>Michael Gysi, Sándor Tóth</b> Object-based modelling in a turbidite type reservoir	47
<b>Kristina Novak Zelenika, Josipa Velić, Tomislav Malvić</b> Application of geostatistics in the description of turbiditic depositional environments, a case study of the Kloštar Field, Sava Depression, Croatia	61
<b>Ágnes Makay, Michael Gysi</b> Köröstarcsa reservoir model based on truncated gaussian simulation technique	73
<b>Janina Horváth, Kristina Novak-Zelenika</b> Application of clustering methods for identification of palaeoenvironments, case study from late miocene sandstones, the Sava Depression	85
<b>PART 3</b>	
MULTIVARIATE STATISTICAL APPROACHES	101
<b>Lidija Galović, Zoran Peh, Josip Halamić</b> Relationship between stream sediment geochemistry and drainage basin lithology in small order mountain drainage basins – factor model of the Medvednica mountain, Croatia	103
<b>Sándor Gulyás, Pál Sümegi</b> The reconstruction of past hydrologies of the river Tisza using multivariable archeomalacological analysis	113

<b>PART 4</b>	
<b>GEOINFORMATICS</b>	<b>131</b>
<b>Bálint Csendes</b>	
Analysis of the climate and vegetation changes on the Great Hungarian Plain 2000–2009	133
<b>Gábor Szántó, László Mucsi, Boudewijn van Leeuwen</b>	
Classification of remote sensing images using self-organizing neural networks	141
<b>József Szatmári, Nándor Szíjj, László Mucsi, Zalán Tobak, Boudewijn van Leeuwen, Csaba Lévai, János Dolleschall</b>	
Comparing LIDAR DTM with DEM-5 of Hungary	151
<b>Hrvoje Horvat, Dario Perković, Adaleta Perković</b>	
Application of a geographical information system to low-scale mapping of stratigraphic unit thickness a case study of basic geological map of croatia	159
<b>EPILOGUE</b>	<b>169</b>
<b>INDEX OF AUTHORS</b>	<b>171</b>
