Abstract	7
1. Introduction	9
2. Central Paratethys sea	13
2.1. Origin of the Central Paratethys	13
2.2. Oligocene and early Miocene (33.9-16.0 Ma)	13
2.3. Middle Miocene (16.0-11.6 Ma)	14
2.4. Late Miocene (11.6-5.3 Ma)	17
3. Badenian stage	19
3.1. Chronostratigraphy	19
3.2. Climate and palaeogeography	19
3.3. Circulation of water masses	20
3.4. Early Badenian sea	22
3.5. Late Badenian sea	22
4. Hungarian localities with Badenian decapods	25
4.1. Budapest area (western part)	25
4.2. Budapest area (eastern part)	36
4.3. Visegrád Mts and Börzsöny Mts	47
4.4. Cserhát Mts	52
4.5. Bakony Mts and Balaton Highland	54
4.6. Mecsek Mts	55
4.7. Sopron Mts	55
5. Decapods as animals	57
5.1. Decapod body plan	57
5.2. Taphonomy and preservation	59
5.3. Taxonomy and classification	60
6. Identifying Badenian decapods	63
6.1. Taxonomically important characters on carapace	64
6.2. Identification key of Badenian decapods of Hungary based on carapace	67
6.3. Taxonomically important characters on chelipeds	75
6.4. Identification key of Badenian decapods of Hungary based on chelipeds	77
7. Badenian decapods of Hungary – Systematic part	83
